

Achieving Excellence in Diabetes Management: *Clinical Workshop in Improving Renal Care*

- ✓ Are you a clinician working in primary care?
- ✓ Are you treating people with diabetes?
- ✓ Would you like to increase your knowledge and confidence in providing good renal care?

The day will include core topics such as:

- Screening for renal disease
- Diabetic nephropathy and non-diabetic kidney disease in T1 and T2DM
- Management of glycaemic control and complications in renal disease
- Renal replacement therapy and transplantation

As well as the opportunity for discussion and putting learning into practice.

This clinical workshop is being offered twice:
